Experience the Power of the Fradan Tornado

The Fradan Tornado stands alone in its class due to its unique structural durability and amazing **PATENTED DESIGN**. This special design allows the air nozzle to rotate from left to right without losing any air volume. The nozzle is equipped with an internal air deflector, directing the air flow up or down while increasing the air velocity, along with offering the ability to turn off the airflow. Steering and air flow direction can be controlled effortlessly, with just a shift of your fingertips, without ever removing your hand off the handlebar, making this a true pleasure to operate.

This commercial machine also features a Hydro Gear hydrostatic transaxle driving system allowing the operator to manipulate sharp turns without destroying the grass and tires. In addition, it features a differential lock "positraction" making climbing hills easier.

Fradan is all about comfort with its ergonomic controls. Simply squeeze the right lever to go forward, the more you squeeze the faster you go. The Left lever simply squeeze to go in reverse, the more you squeeze the faster you go. For steering simply move the handlebars left to right.

IMPELLER-
18 Inch Cast
Aluminum Alloy

ENGINE FEATURES-

- Donaldson Dual Filter
- External Oil Cooler
- Quick oil Drain System (No tools needed)
- Low oil Alert
- Anti/After Fire control
- 20Amp Battery Charging system
- Fuel Capacity: 6 gallons
- Starter- TurnKey Electric Start

IMPELLER-

- 18inch Cast Aluminum Alloy
- Turbine design w/ easy removable tapered locking hub.

NOZZLE-

- Adjustable Electric Gear driven rotatable to 180degrees.
- Adjustable Electric Gear driven
- Built in Air Deflector

DEFLECTOR-

- Features Full Air shut down mode.
- Adjustable

DIMENSIONS - 75" x 38" x 56"
DRY WEIGHT - 650 lbs
